Responsive Design

The new 2.0 design makes My Virtual StrongBox more flexible, more accessible and more personal. Reorganize folders and files however you choose. Use My Virtual StrongBox from your mobile browser or on nearly any other device for your convenience.

Desktop ↻ Tablet ↻ Smartphone

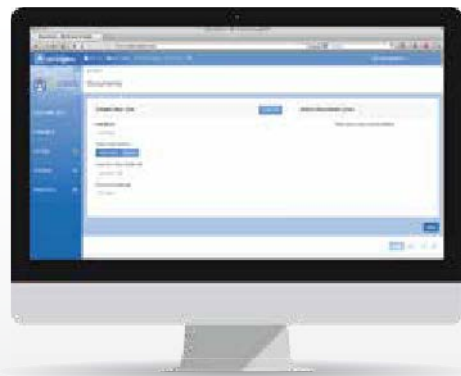

Drag and Drop

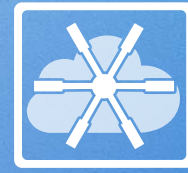

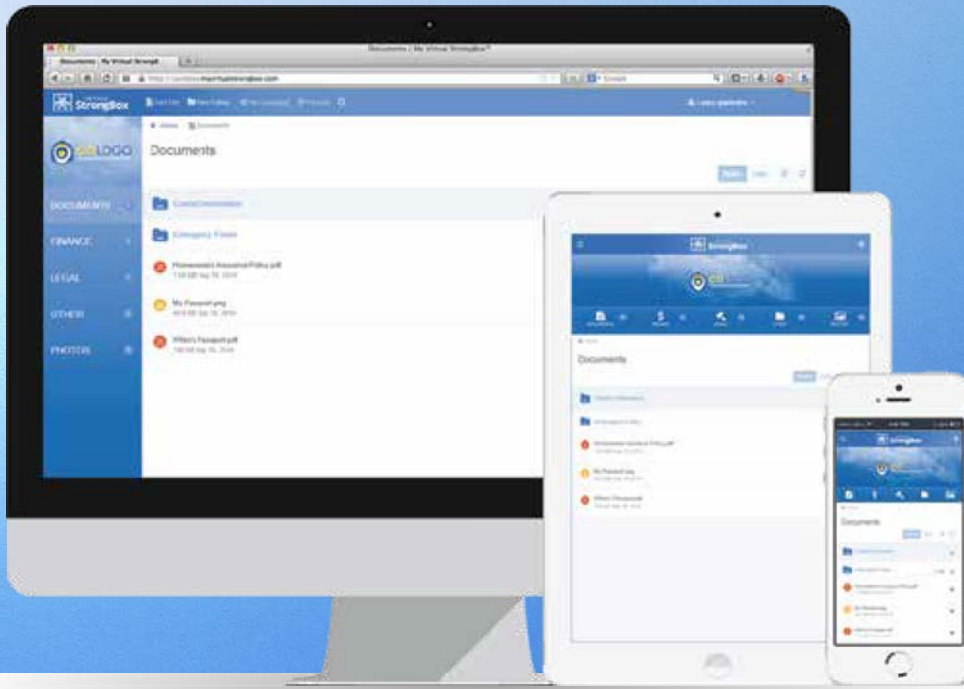

You can now drag and drop folders and files into your My Virtual StrongBox account, as well as between folders inside the application. Our new "breadcrumb" feature will allow you to go from an interior folder back to the main folder in the application, or to any folder in-between.

Enterprise File Exchange

Your financial organization can now share sensitive files directly with consumers. Want to send a customer a personalized lending agreement and avoid the inbox? Use My Virtual StrongBox to push documents to one or more My Virtual StrongBox accounts.

myVIRTUAL
StrongBox

In a world that is moving toward electronic documents and away from paper, your customers demand a secure place to save their most valuable information.

My Virtual StrongBox lets your customers place and hold electronic copies of their documents in online safe deposit boxes.

Safe & Trusted

- Files are protected with AES 256-bit encryption
- Data centers are monitored 24 hours a day
- Transport layer security protects data transmission
- Supports Perfect Forward Secrecy (PFS) that ensures a session key cannot be compromised

Dedicated

- Only subscribers have access to the documents they load
- Safely share documents with trusted users
- No timeout on file storage - files stay put until users delete them

Versatile

- Store multiple file types
- Easy-to-use file management system
- Easy upload/download interface
- Seamless integration with online banking, personal financial management tools and other wealth management systems.
